

Navigating to the Vista Systems FTP site

Vista Systems has a new procedure for all downloads including firmware.

Please use the below link to register. Once registered the password and username info will be provided along with the new customer download site .

<https://vistasystems.sharefile.com/i/icd7db2fac3646729>

Spyder 300 and 200

For Control Software and Firmware navigate to *Customer Downloads/Spyder Suite 2005 folder/released/Version X.X.X (current release number)*.

Copy the entire folder and select the install file.

Spyder Suite software must be installed on Windows XP, Vista, or Win 7 to run properly.

For a graphical description of the Spyder please review the PowerPoint file, *Spyder 200-300 series overview.ppt*, located in the *Customer Downloads/Sales Material folder* on the ftp site.

You can also go to our website: (<http://vistasystems.net/TrainingVideos/TrainingVideoBrowser.aspx>) and watch one of ten basic training videos to get you acquainted with the Spyder interface. Once the software is loaded to your pc both software and hardware manuals are in the suite in pdf form.

URS 1608:

For the PowerPoint on the new URS 1608 navigate to the *Customer Downloads/Sales Material* on ftp site and copy *URS overview.ppt*

Firmware and URS control software is located under *Customer Downloads/URS/Release/Client Version X.X.X (current release number)*

Spyder X20

For the PowerPoint on the Spyder X20 series navigate to *Customer Downloads/Sales Material* on ftp site. and copy *X20 version X.pptx*

Firmware and X20 control software is located under *Customer Downloads/Spyder Control Suite 2009/Release/Client Version X.X.X (current release number)*
